

Sodikjon Nurmirzaev

FULL-STACK DEVELOPER

Seoul, South Korea | Tel: 010 6545 6697 | Email: mr.sodiqjon.uz@gmail.com | GitHub: <https://github.com/DevSodikjon>

A software engineer with hands-on experience in web development, specializing in creating dynamic and responsive web applications. Proficient in modern web technologies and frameworks, and dedicated to delivering high-quality user experiences and ensuring optimal performance across all devices.

WORK EXPERIENCE

MAXDORA LLC, Tashkent

2023 August - 2024 December

Frontend engineer

Megagold.uz Project

- developed new user interface for Megagold's marketing website using Laravel.
- utilized technologies include SCSS, JavaScript, REST API, and SPA.
- enhanced my skills in writing clean code through the process of rebuilding various websites.
- individually optimized the application for responsiveness across all devices, including mobile, tablet, and desktop.

Impex-Insurance.uz Project

- created new user interfaces for the insurance agency's website utilizing Laravel.
- took full experience of utilizing additional technologies namely SCSS, JavaScript, REST API, and SPA.
- contributed significantly to improve the proficiency in Laravel while working on this project.
- designed the website to ensure compatibility with mobile, tablet, and desktop formats.

Medical Private Project

- worked on this project aiming at enhancing knowledge of React.js
- implemented the frontend technologies including SCSS, JavaScript, and SPA.
- made the application compatible for allowing users to access information about doctors and facilitating appointment bookings based on health concerns.
- achieved full responsiveness ensuring usability on mobile, tablet, and desktop devices.

Najot Ta'lim LLC, Tashkent

2023 October - December

Frontend engineer

Furniture (course project)

- developed the web application to enhance my proficiency in React.js.
- used technologies such as SCSS, JavaScript, and SPA in the project.
- designed the platform to provide comprehensive information on furniture marketing and facilitate ordering processes.
- implemented product calculation section to enable users to calculate and place orders for furniture efficiently.
- prioritizing responsiveness, ensured optimal performance across mobile, tablet, and desktop devices.

Order Pizza Application (private project)

- created the application to experience pizza ordering process, allowing users to order pizza by selecting size and ingredients.
- implemented functionality that dynamically displays an order receipt on the screen, with subsequent orders added alongside previous ones.
- utilized technologies including only HTML, CSS and JavaScript.

EDUCATION & CERTIFICATIONS

Sejong University, Seoul, South Korea

2025 March - 2029 March(Expected)

Bachelor of Computer Science and Engineering

NAJOT TALIM (one of the top bootcamps specialized in teaching moderns technologies), Tashkent, Uzbekistan
Graduate of "Full-Stack Web Programming" program

2022 August - 2023 November
